## CHALLENGE

# Boost collaboration to save time and drive efficiencies

With a variety of projects, Revolution Medicines was challenged when it came to real-time collaboration with their team and needed to find a way to simplify their financial reporting process.

Revolution Medicines was in search of a tool that allowed for team members to review documents simultaneously and review XBRL tagging. Since they did not have a way to collaborate in real-time, this led to hours of manual review, which was time-consuming.

## SOLUTION

# New ActiveDisclosure is Faster, Easier to Use, and More Affordable

Revolution Medicines was looking for a solution that would allow their team to collaborate in real-time and to increase efficiency of their financial reporting and SEC filing. New ActiveDisclosure allowed the team to easily collaborate on projects in real-time, simplify iXBRL tagging and streamline processes that were time-consuming in the past. New ActiveDisclosure also saved the client time and allowed their team to work in Excel and link data for collaboration and reporting.
